

LEARNING EXERCISE: Filling Out the MAR, Scenarios 5-8

5

Jim has atrial fibrillation and is taking warfarin for this. Currently he is taking warfarin 2 mg at 2 pm daily. He had his protime/INR tested on January 31. The following morning (which is a Friday) his physician gives you a new prescription for warfarin with a change in dose. That same morning, you pick up the prescription and transcribe the new orders to the MAR. Jim has no allergies.

Using the following prescription, fill out the MAR. Use no abbreviations (except “mg” may be used).

Mary Smith has asthma and recently came down with a viral infection. She was having difficulty breathing so saw Dr. Hartman this morning, March 1st. He prescribed prednisone to help treat the inflammation. Mary is allergic to Penicillin.

You picked up her prescription at noon and now must help Mary take her medications. First you must make out the new MAR using this prescription.
