

# Psychology

Individuals working in the field of psychology apply clinical skills, and use specialized knowledge gained from experience in forensic mental health settings, and may conduct assessments, provide treatment, and evaluations. Individuals working in this field typically have knowledge of the criminal court system and issues which exist where behavioral health and the law intersect.

## About DSHS

The Department of Social and Health Services' Behavioral Health Administration (transforms lives by supporting sustainable recovery, independence and wellness. Within BHA, the Office of Forensic Mental Health Services), provides information about careers in forensic behavioral health which play an important role in improving the lives of individuals with behavioral health conditions involved in the criminal court system. For more information about positions open within DSHS, please visit [www.careers.wa.gov](http://www.careers.wa.gov).

## Forensic Behavioral Health

Forensic behavioral health is the intersection of behavioral health and the law. The system itself involves various entities that have a touchpoint to people who are involved with the criminal court system and may have a behavioral health condition.

Choosing a career as a practitioner in this human services field offers many diverse work environments. Examples include, working with law enforcement in co-responder roles or in a corrections setting; in inpatient settings such as state psychiatric facilities and residential treatment facilities; and in community settings such as outpatient competency restoration programs, or community behavioral health agencies. Service providers in this field often interact with legal partners such as lawyers and judges, corrections officers, and first responders.

# Pathway to Forensic Behavioral Health Psychology

## Examples of Work Environments

With a bachelor's degree in psychology, an individual may work in inpatient settings in state psychiatric facilities as an Institutional Counselor. With a master's degree in psychology a graduate might work in the same setting as a Psychology Associate. Community behavioral health organizations also hire graduates of psychology programs in various roles. At the doctorate level, as a licensed psychologist, you may choose to work as a Forensic Evaluator or as a treating Psychologist.
