PURPOSE

This policy establishes guidelines for the review of the deaths of individuals who were clients of the Developmental Disabilities Administration (DDA) and were receiving paid services at the time of their death. These reviews are intended to monitor support systems and programmatic operations to ensure reasonable medical, educational, legal, or psychological interventions were being provided prior to deaths. A “reasonable” intervention is one that would have been possible given known circumstances and resources available. The systematic review of deaths described in this policy does not replace procedures conducted by investigative agencies.

SCOPE

- Adult Family Homes (AFH);
- Children’s Intensive In-home Behavioral Support (CIIBS) services;
- Community Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/ID);
- Companion Homes (CH);
- Certified Residential Services, which includes Supported Living (SL) and State Operated Living Alternatives (SOLA) programs, Group Homes (GH), Group Training Homes (GTH),
- Licensed Staffed Residential Homes;

 2. If the death occurred when the client was in the care of a paid Individual Provider (e.g., Medicaid Personal Care or respite care provider) or Alternative Living program, the CRM must consult with the RA and/or designee and the QAM to determine whether additional follow up is warranted. The outcome of this consultation and the grounds for the decision on whether or not to request a mortality review must be documented in the DDA IR System.
 3. If the death was unusual or unexplained, refer to Section D of this policy.
- D. Regional Fact Finding Review
- In cases where the circumstances of the death were unusual or unexplained, the region may assemble a "mortality review team" to conduct an additional internal fact finding review and make recommendations for follow up action, as appropriate.
