DEVELOPMENT DISABILITIES ADMINISTRATION (DDA)
Transitional Care Planning and Tracking
Part A. Transition Preparation

Purpose: This document is intended to be used as a facilitation guide and tracker for DDA staff coordinating a move from one setting to another. Case Managers who are facilitating care coordination meetings will use this document to track progress and highlight individual needs and readiness to transition to their identified setting. A copy will be provided to the individual and their representative to update them on transition progress as well as to transition team members as appropriate.

A. Transition Preparation: Individual requests to move to a new setting.

Transition preparation consists of the tasks that are needed to identify the individual's goals and support needs, identify preferred setting to live, and review eligibility for applicable programs. In some cases, the individual will transfer to a transition or RCL caseload or to a different office or region. The new case manager will facilitate the team meetings that occur in the ACT stage (see Part B). In these cases, the primary case manager will transfer the case after mutual acceptance has occurred between an individual and a provider after a warm handoff.
