

Traffic Gardens are...

fun, safe places for families to learn the rules of the road! *The SAFE KIDS Traffic Garden Toolk helps communities create temporary or permanent traffic gardens.*

What are traffic gardens?

Traffic gardens are mini roadways with painted or chalked lines. They are built in safe places so children can learn and practice safe biking and walking skills. These skills can lead to safe driving skills and awareness of others on the road.

The SAFE KIDS Traffic Garden Toolkit has information and resources for planning your own traffic garden:

- Tips on picking locations
- Tips on building strategic partnerships
- Tips on how to design your garden for your community
- A list of common supplies and equipment
- A budget template to figure out how much your traffic garden might cost
