

KITSAP County

Drug Court Participants: Recidivism and Key Outcome Measures

NOVEMBER 2018

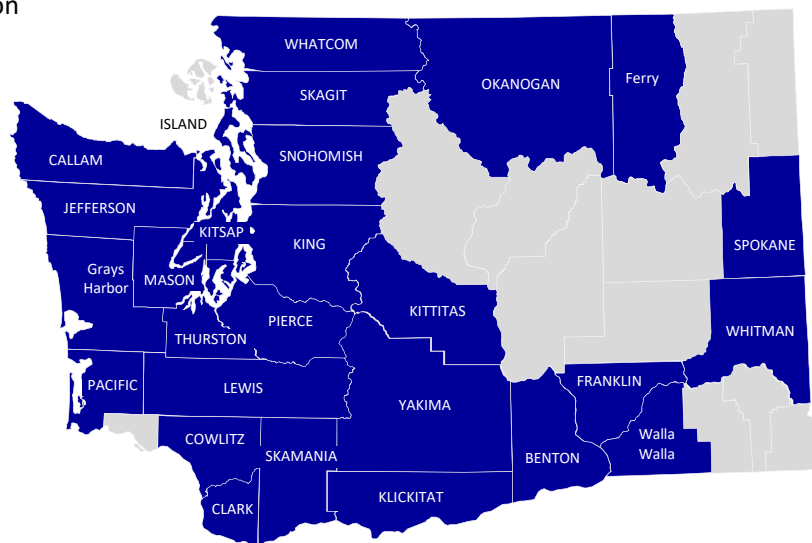

This dashboard presents indicators for monitoring recidivism and other key outcomes among offenders participating in Adult Drug Court. Drug Courts aim to reduce recidivism through judicially supervised substance use disorder treatment, mandatory periodic drug testing, community supervision, use of sanctions and other rehabilitation services. County-level and statewide trends in drug court enrollment, demographics, recidivism, substance use disorder treatment participation, employment and Medicaid coverage rates are presented for individuals admitted to drug courts. Dashboard indicators are presented only for individuals who started substance use disorder treatment. Due to recent initiatives to integrate behavioral and physical health and changes in associated reporting systems (including the elimination of TARGET), new enrollments for 2016 may be underreported and should not be interpreted as a decrease in the number of individuals participating in drug courts. Because Clark and Skamania counties were "early adopters" of integrated behavioral health and physical health care, 2016 dashboard indicators for these two counties were particularly impacted by these reporting changes. This is part of a series of analyses for the HCA Division of Behavioral Health and Recovery describing the experiences of recipients of treatment funded by the Criminal Justice Treatment Account (CJTA). The CJTA pays for substance use disorder treatment and recovery support services for offenders with substance abuse problems.

These measures were produced by the DSHS Research and Data Analysis Division in collaboration with:

- HCA Division of Behavioral Health and Recovery
- Washington State Adult Drug Courts

In 2018, twenty-seven counties in Washington state offered Adult Drug Courts including:

- Benton
- Clallam
- Clark
- Cowlitz
- Ferry
- Franklin
- Grays Harbor
- Island
- Jefferson
- King
- Kitsap
- Kittitas
- Klickitat
- Lewis
- Mason
- Okanogan
- Pacific
- Pierce
- Skagit
- Skamania
- Snohomish
- Spokane
- Thurston
- Walla Walla
- Whatcom
- Whitman
- Yakima

KITSAP County

Drug Court Participants: Recidivism and Key Outcome Measures

TECHNICAL NOTES

POPULATION

- **Total New Enrollment:** Includes all new drug court participants who started substance use disorder treatment within 12-months of their drug court start date. The dashboard indicators are based on the enrolled population. Blank cells indicate data were missing or suppressed due to fewer than 10 enrolled participants.
- The decrease in new enrollment in 2016 is due to underreporting of treatment records during the implementation of a new behavioral health data system and the integration of behavioral and physical health care. It should not be interpreted as a decrease in the number of individuals participating in drug courts. Future updates will address this shortcoming with available data.

INDICATORS

- **Recidivism:** Defined as a new conviction for an offense that occurred 18- or 36-months after the month the participant started substance use disorder treatment. The conviction may occur anytime after the offense date. The average number of prior convictions is based on a count of all charges that resulted in a conviction for offenses that occurred prior to the treatment start date. Conviction data were obtained from the Administrative Office of the Courts.
- **Substance Use Disorder Treatment:** The Washington Circle Measure of Engagement is defined as initiating substance use disorder treatment and receiving two additional services within 30 days of initiation. Retention is an additional measure used in Washington State which is defined as receiving treatment services at least once per month for the first 90 days after initiation, or completing treatment and being discharged within 90 days, or transferring to a residential treatment facility within 90 days. Engagement and Retention measures are calculated only for those whose first treatment episode was an outpatient service. Data from the Treatment and Assessment Report Generation Tool (TARGET) and the Behavioral Health Data System (BHDS) were used to identify substance use disorder treatment, primary substance and average days of treatment. Treatment shown is not necessarily the treatment approved by the court. Due to changes in the behavioral health data system, the engagement and retention measures are not currently available.
- **Employment:** Quarterly employment and earnings data were obtained from the Washington State Employment Security Department. Median quarterly earnings and hours worked is reported only for individuals with non-zero earnings during the quarter.
- **Medicaid Enrollment:** Obtained from eligibility codes available in the DSHS Integrated Client Database (ICDB).

DATA SOURCES

- DSHS Integrated Client Database
- Washington State Drug Courts
- Drug Court Case Management System (DCCM)
- Administrative Office of the Courts Adult Drug Court Docket Codes

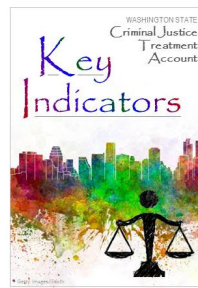

MISSING DATA

- Klickitat, Pacific, Skagit and Whitman county drug court data are missing for 2016.
